

Does higher COQ8A accompany a more open myogenesis programme?

A Four libraries, paired within each library

Line 1 · stem
211 matched pairs

Line 1 · differentiated
326 matched pairs

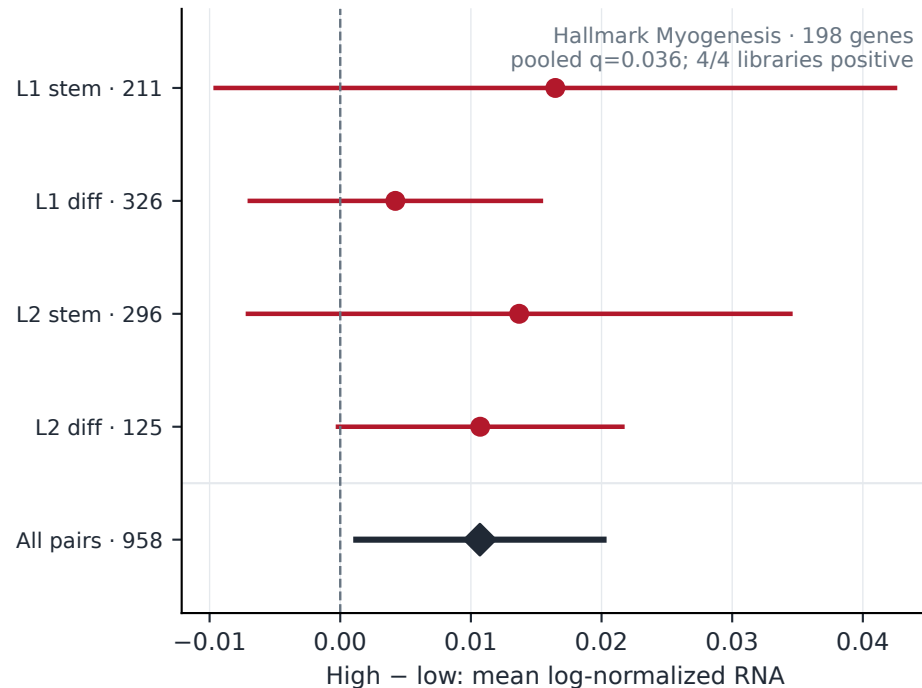

Line 2 · stem
296 matched pairs

Line 2 · differentiated
125 matched pairs

Same nucleus: RNA + ATAC | COQ8A ≥ 2 versus 1 UMI | TSS enrichment ≥ 3

B Muscle programme RNA

Hallmark Myogenesis · 198 genes
pooled $q=0.036$; 4/4 libraries positive

C Nearby chromatin accessibility

Hallmark Myogenesis · 198 genes
pooled $q=0.207$; 2/4 libraries positive
